**Shaping the Future of Learning:**  
The Role of AI in Education 4.0

INSIGHT REPORT  
APRIL 2024

# THE ROLE OF AI IN EDUCATION 4.0

WORLD ECONOMIC FORUM  
INSIGHT REPORT

# GLOBAL KEY CHALLENGES

## 1 SHORTAGE OF TEACHERS

Obstacle to improving education outcomes

## 2 NON-TEACHING TASKS

Impacting the time they have to focus on quality interactions with students

## 3 DIGITAL SKILL GAP CLOSING

Critical factor in ensuring the future employability of students

## THE ROLE OF AI IN EDUCATION 4.0

If **managed well**, technology – particularly artificial intelligence (AI) – offers a **unique opportunity to help education systems enable Education 4.0** – teaching and learning approach that focuses on providing learners with the abilities, skills, attitudes and values fit for the future.

# FUTURE OF JOBS

40%

## JOB TRANSFORMATION

Core skills required in all jobs expected to change in the next 5 years.

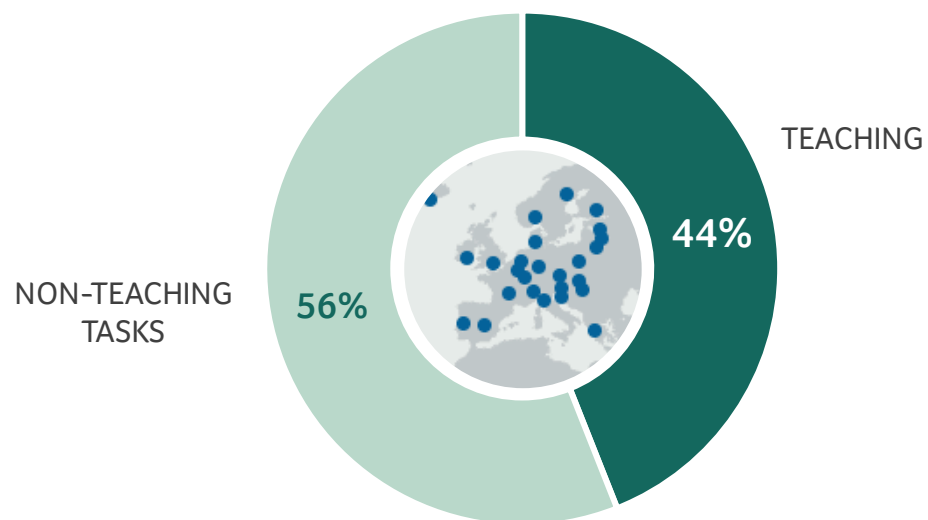

## THE ROLE OF AI IN EDUCATION 4.0

There is an opportunity for AI and other emerging technologies to ensure that **teaching** emerges as a “**future-ready**” profession.

# NON-TEACHING TASKS

## ADMINISTRATIVE TASKS

In the latest OCED<sup>1</sup> Survey, the main source of stress for teachers in both primary and lower secondary education has been “**having too much administrative work to do**”, at 47% and 48%, respectively.

# AI INTEGRATION

## GENERATIVE AI USE IN EDUCATION

Primary and Secondary teachers in the UK using generative AI to aid with their schoolwork in 2023.

## DIGITAL SKILL

To prepare workers and address global digital and skills shortages in the medium-to-long term, teaching about technology, including AI, must be emphasized in education.

# PROMISES OF AI IN EDUCATION

## SUPPORTING TEACHERS' ROLE

Streamline a broad set of administrative tasks for teachers, allowing them to dedicate more time to engage with students.

## REFINING ASSESSMENT

AI can help teachers in assessing learners more rapidly and enabling them to provide more immediate feedback

## SUPPORTING DIGITAL LITERACY

AI can enable students and learners to develop digital literacy, critical thinking, problem-solving and creativity skills

## PERSONALIZED LEARNING

AI can help Teachers personalizing the learning experience, leading to improved academic performance and better adaptation to diverse learning needs

## SKILL EMPOWERMENT

Learning about AI and digital skills – even through traditional methods – can support learners in being prepared for the jobs of tomorrow.

# IMPACT OF AI IN EDUCATION

20%

## TASK AUTOMATION

Work time on clerical activities and administrative tasks, such as assessing attendance, enrolment and other forms of data analysis, that could be automated with AI.

# IMPACT OF AI IN EDUCATION

## AUTOMATABLE TASKS

- Compile lists of books, periodicals, articles and audio-visual materials on particular subjects.
- Verify facts, dates and statistics, using standard reference sources.
- Grade homework and tests, and compute and record results, using answer sheets or electronic marking devices.

## AUGMENTABLE TASKS

- Analyse performance data to determine effectiveness of instructional systems, courses or instructional materials.
- Design learning products, including Web-based aids or electronic performance support systems.
- Develop teaching or training materials, such as handouts, study materials or quizzes.
- Prepare assignments for teacher assistants or volunteers.

## ASSESSMENT AND ANALYTICS IN EDUCATION

Similar to how human tutors can offer instant, personalized feedback, **AI automation in assessments can allow for immediate feedback** on a larger scale, aiding students in comprehending mistakes and supporting teachers in identifying areas for improvement.

## AI AND DIGITAL LITERACY

Integrating AI into curricula does not imply that every student must become an AI expert. The emphasis should be on **cultivating awareness** and **nurturing curiosity**, by teaching students how to **assess the reliability of sources** and **discern the accuracy of information** presented on websites.

From **WHAT** to ask to **HOW** to ask

## CASE STUDY | LETRUS, BRAZIL

### LEVERAGING LITERACY THROUGH AI

Letrus focuses on **personalized learning through AI**, offering immediate feedback to students.

Teachers receive **tailored recommendations** for content and methodologies

School managers can **monitor progress** and gain immediate insights into improvement areas as well as **emerging learning gaps** that may benefit from targeted intervention.

Within five months of programme implementation, participating students achieved the **2<sup>nd</sup> position** in the national writing exams, a remarkable improvement compared to the 8<sup>th</sup> position attained by the control group.

# CASE STUDY | AI TUTOR PROJECT, UAE

UNITED ARAB EMIRATES  
MINISTRY OF EDUCATION

## PROMOTING EDUCATIONAL EQUITY

The AI tutor **tailors lessons to the individual needs** and learning styles of each student, ensuring that they receive the right level of challenge and support.

It continually assesses student progress, **identifying areas of improvement** and providing targeted feedback and additional resources to help students overcome their challenges.

Finally, it aims to **alleviate teacher workload**, enabling them to focus on more strategic and interactive aspects of the learning experience.

During the piloting stage, the AI Tutor demonstrated a **10% increase in learning outcomes**.

## CASE STUDY | AI DIGITAL TEXTBOOKS, SOUTH KOREA

### ENABLES CUSTOMIZATION FOR LEARNERS

The introduction of digital textbooks will enable **customized learning opportunities** for students, who will receive tasks and activities differentiated based on individual proficiency, allowing students to learn at their own pace.

The Ministry of Education emphasizes **the coexistence of paper and digital** formats in schools.

The plan also emphasizes collaboration between human teachers and AI assistants, with a focus on **fostering lead teachers** who provide humanized guidance alongside AI technology.

The rollout of the program is expected to begin in 2025, involving 400 teachers who will be using the AI-powered textbooks in their teacher training.

## LOOKING AHEAD

### CONCERN ON AI

People concerned about potential risks of AI integration in Education

# LOOKING AHEAD

## COLLABORATION

AI for education must be developed in collaboration with educators, ensuring it meets the diverse learning needs of students, supports teachers in their focus on human interactions.

## SECURITY

AI integration in education must ensure the protection of sensitive information by implementing robust data privacy and security protocols

## TRAINING

Students, teachers and administrators must receive necessary training and upskilling opportunities oriented to their needs to help them make the most productive use of AI systems.

## EQUITY

Equity and inclusion considerations must be central to the design of programs to ensure that AI literacy is widely imparted and the benefits of AI technologies in education accrue widely.

# AI FOR THE IT INDUSTRY

# EU REGULATIONS

AI ACT

GREEN DEAL

# ARTIFICIAL INTELLIGENCE ACT

**The AI Act** is a European regulation on artificial intelligence – the **first comprehensive regulation on AI** by a major regulator anywhere..

The European Council formally adopted the EU AI Act on 21 May 2024.

The AI Act will be formally published in the Official Journal in June/July.

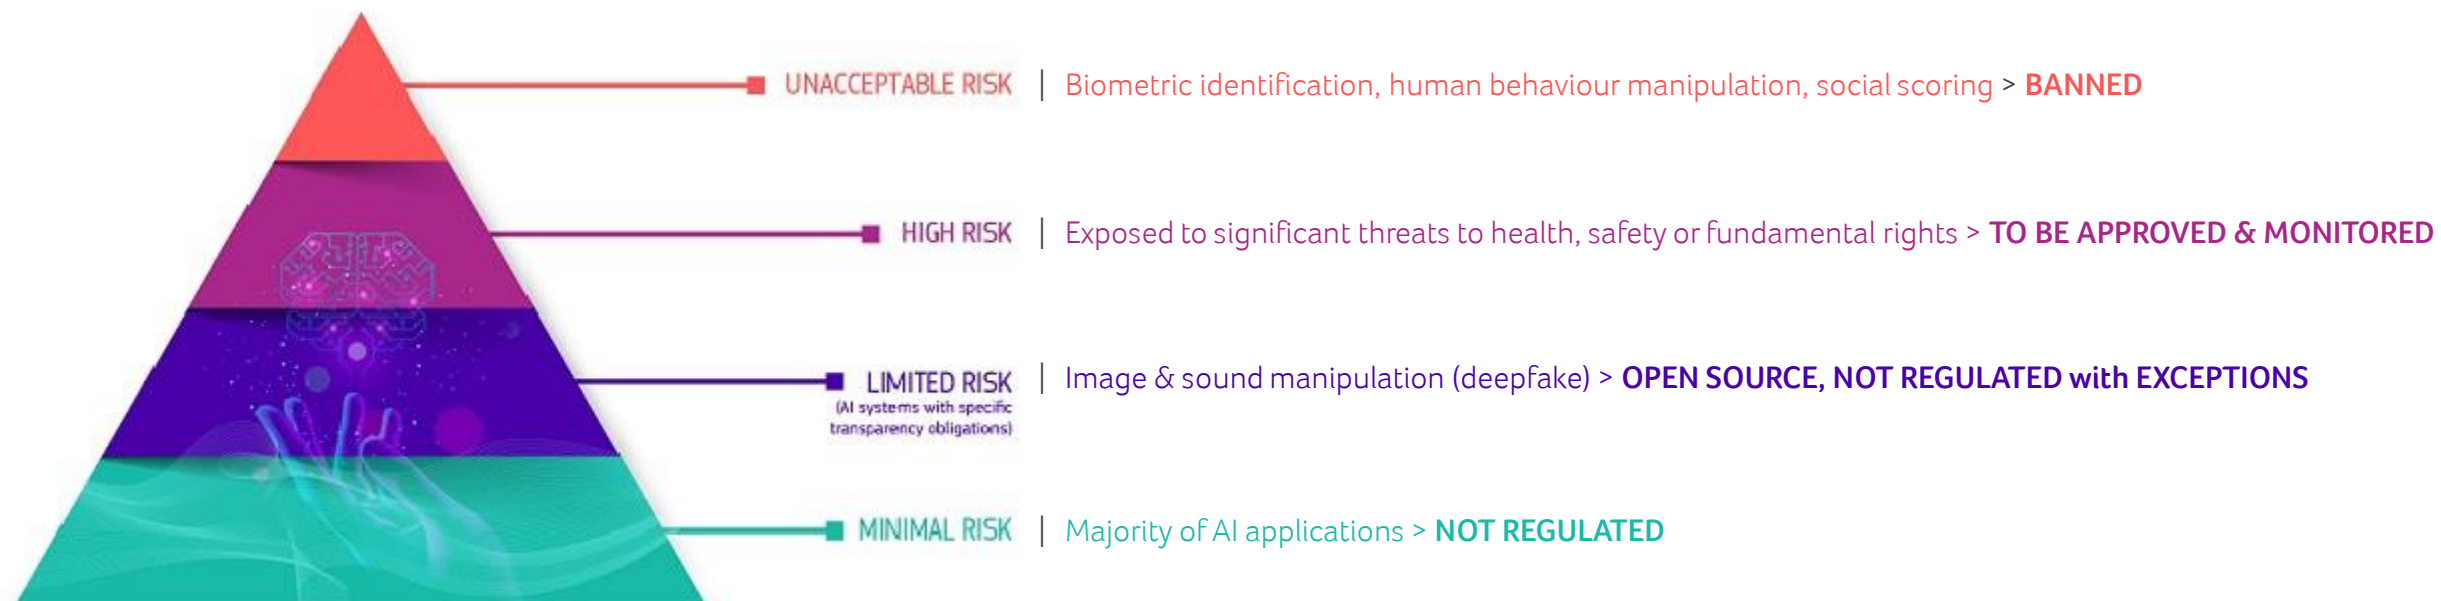

EU Member States will have two years for the implementation.

# ARTIFICIAL INTELLIGENCE ACT

## EU Artificial Intelligence Act

# AI & SUSTAINABILITY

# AI & SUSTAINABILITY

## Contributions

### Efficiency

AI can optimize processes, reduce waste, and improve resource utilization

### ESG Goals

by speeding up market trend analysis, ensuring risk management, and facilitating data collection or report generation.

## Challenges

### Energy Consumption

Training generative AI models requires significant compute resources, contributing to carbon emissions.

# EUROPEAN GREEN DEAL

The **European Green Deal** is the EU's strategy for reaching the **climate neutrality by 2050**.

The NextGenerationEU Recovery plan will finance the European Green Deal with **€600 billion**, one third of the total.
